

# **TripAdvisor Features Overview**

---

This document compiles 40 TripAdvisor features across three sections: 20 features common to popular restaurant review platforms, and two sets of 10 features that are more distinctive to TripAdvisor.

## Section 1: 20 Common Features

Features shared across TripAdvisor and other popular restaurant review websites.

---

### 1. User-Generated Reviews

Users can submit written reviews about their dining experiences.

### 2. Star/Rating System

Restaurants are rated on a numeric or star scale aggregated from user reviews.

### 3. Restaurant Search & Filters

Users can search for restaurants by cuisine, location, price range, and other filters.

### 4. Restaurant Profile Pages

Each restaurant has a dedicated page with photos, hours, contact info, and reviews.

### 5. Photo Uploads

Users and restaurants can upload photos of food, ambiance, and the venue.

### 6. Menu Display

Restaurants can list their menus, including dishes and prices.

### 7. Business Owner Responses

Restaurant owners can respond publicly to reviews left by diners.

### 8. Bookmark / Save Restaurants

Users can save or bookmark restaurants to a personal list for future reference.

### 9. Mobile App

A mobile application is available for iOS and Android for on-the-go access.

### 10. Location-Based Search

Restaurants are surfaced based on the user's current or searched location.

### 11. Price Range Indicator

Restaurants are tagged with a general price range (e.g. \$, \$\$, \$\$\$).

### 12. Cuisine Type Tags

Restaurants are categorized and filterable by cuisine type (Italian, Thai, etc.).

### 13. Hours of Operation

Restaurant listings include their opening and closing hours.

### 14. Contact Information

Phone number, website, and address are displayed on the restaurant profile.

### 15. User Profiles

Registered users have profiles that display their review history and activity.

#### **16. Review Helpfulness Voting**

Users can mark reviews as helpful or useful, surfacing the most relevant ones.

#### **17. Social Sharing**

Users can share restaurant pages or reviews on social media platforms.

#### **18. Notifications & Alerts**

Users receive notifications about new reviews, responses, or saved restaurant updates.

#### **19. Review Sorting & Filtering**

Reviews can be sorted by recency, rating, or relevance.

#### **20. Accessibility Information**

Some platforms note whether restaurants are wheelchair accessible or offer other accommodations.

## Section 2: 10 (kinda) Unique TripAdvisor Features

Features that differentiate TripAdvisor from competitors like OpenTable and HappyCow.

---

### 1. Restaurant Ranking based on Reputation

Ranks restaurants based on rating, number of reviews, recency and reviewer credibility.

*OpenTable: booking driven ranking*

### 2. Multi-Dimensional Review System

A restaurant is rated for their food quality, Service, Value and Atmosphere.

*OpenTable: Dining experience focused*

*HappyCow: dietary focused reviews*

### 3. Dynamic Price Intelligence

Shows average cost per person.

*OpenTable: Menu Pricing only*

*HappyCow: very limited in price comparison*

### 4. Fraud Detection System

Detects spam reviews and suspicious rating spikes.

*OpenTable: Uses only verified diners*

### 5. User Credibility and Trust System

Assigns user scores based on number of reviews and review quality.

### 6. Personalized Recommendation Engine

Recommends restaurants based on past likes, budgets etc.

*Opentable: Reservation based*

*HappyCow: only dietary recommendations*

### 7. Map Based Discovery System

Interactive map that shows a cluster of restaurants and their locations.

*OpenTable: Reservation based maps*

### 8. Wait Time Prediction System

Predicts how busy a restaurant is on a specific day.

*OpenTable: Booking times*

*HappyCow: none*

### 9. Offline Access

Allows users to view saved restaurants offline.

*Other Platforms: Less emphasis*

### 10. Auto Translate

Automatically translates reviews to your specific language selected.

*OpenTable: Region Focused*

## Section 3: TripAdvisor Distinctive Features

Additional features that highlight TripAdvisor's broader travel and platform capabilities.

---

### 1. Travel Forums by Destination and Theme

TripAdvisor has active discussion boards where travelers ask questions and exchange advice by destination or travel topic.

### 2. Destination-Specific Travel Discussion

The forum system is organized around locations, making it easier to get advice for specific cities and regions.

### 3. Large-Scale Travel Guidance Platform

TripAdvisor positions itself as a broad travel guidance platform with hundreds of millions of reviews and opinions across millions of listings.

### 4. Multi-Category Travel Coverage

TripAdvisor covers accommodations, restaurants, experiences, airlines, and cruises in one ecosystem.

### 5. Flight and Airline Reviews

TripAdvisor includes airline-related travel content, extending beyond typical restaurant or hotel review sites.

### 6. Low Price Comparison

The platform helps travelers compare low prices on hotels, flights, and cruises.

### 7. Tour and Attraction Booking

Users can book popular tours and attractions directly through TripAdvisor.

### 8. Restaurant Table Reservations

TripAdvisor supports table reservations at restaurants, adding a booking layer to restaurant discovery.

### 9. Review Moderation and Fraud Detection

TripAdvisor publicly emphasizes anti-fraud systems, automated checks, and human moderation for review integrity.

### 10. Traveler Ranking System

TripAdvisor uses proprietary ranking processes that affect how businesses appear in traveler rankings.
